DETAILED ACTION

Election/Restrictions

Applicants' election of Group I in response dated September 26, 2005 is noted. Upon further review of elected Group I, claims 1-23, further restriction is deemed essential for a proper search.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 are, drawn to a method for cleaning a furnace and heat treating a workpiece, classified in class 148, subclass 559+.
- II. Claims 15-23 are, drawn to a method for heat treating a coated workpiece, classified in class 427, subclass 534+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the product is coated. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
